Raynet GmbH is an innovative, technology-oriented service provider that specializes in the implementation and management of IT projects, particularly in the areas of system management, software management, software packaging, software distribution, software migration and client engineering. Since its foundation in 1999, large and medium sized companies became Raynet customers, who operate in telecommunications, logistics, the financial industry as well as chemistry and pharmacy. Every customer will be served by a highly qualified and creative team which successfully fulfills the individual requirements of our customers with great competence and with the efficient use of state of art tools and systems.

For almost 10 years our company has continuously pursued the aim of supporting our customer's business success in an optimal way by using innovative solutions, leading technologies and by delivering outstanding qualitative services. Based on these long term and profound principles we have developed a comprehensive portfolio of products and services, for which we here provide an overview.

Raynet belongs to the top IT service providers in the area of software management, software packaging and software distribution and works jointly with the world's leading manufacturers in this area.

Besides the product offerings and successful experience in large projects, Raynet puts its main emphasis on customer-centric services and result driven approaches.

Your success and the contribution we add to it are the yardstick when we measure our performance!
